Annual Review of Materials Science
Volume 14, 1984

CONTENTS

EXPERIMENTAL AND THEORETICAL METHODS
Synchrotron Radiation Photoemission Spectroscopy of Semiconductor Surfaces and Interfaces, *G. Margaritondo and A. Franciosi* 67
Application of the Pseudopotential Model to Solids, *Marvin L. Cohen* 119
PREPARATION, PROCESSING, AND STRUCTURAL CHANGES
Itinerant Electron Magnetism, *Tōru Moriya and Yoshinori Takahashi* 1
High-Speed Machining of Metals, *D. G. Flom, R. Komanduri, and M. Lee* 231
Ceramics via Polymer Pyrolysis, *Kenneth J. Wynne and Roy W. Rice* 297
Ion Implantation in Metals, *S. T. Picraux* 335
PROPERTIES AND PHENOMENA
Electronic Properties of Small Particles, *Ryogo Kubo, Arisato Kawabata, and Shun-ichi Kobayashi* 49
Polymer Fatigue, *Michael T. Takemori* 171
Brittle Fracture and Toughening Mechanisms in Ceramics, *S. M. Wiederhorn* 373
STRUCTURE
Photoeffects at the Semiconductor/Liquid Interface, *Nathan S. Lewis* 95
SPECIAL MATERIALS
Tailoring of Piezoelectric Ceramics, *W. Heywang and H. Thomann* 27
Polymer Modification of Electrodes, *Royce W. Murray* 145
Inorganic Ion Exchangers with Layered Structures, *Abraham Clearfield* 205
Proton Transport in the β/β''-Aluminas, *K. G. Frase, G. C. Farrington, and J. O. Thomas* 279
INDEXES
Subject Index 405
Cumulative Index of Contributing Authors, Volumes 10–14 412
Cumulative Index of Chapter Titles, Volumes 10–14 414
